ABOUT UNIVERSITY OF LONDON

The University of London is one of the oldest and most prestigious universities in the UK and is internationally regarded as a centre of academic excellence. In 1858, they made their degrees available to study anywhere in the world.

The University of London is the UK's leading provider of digital and blended distance education internationally, offering programmes to more than 48,000 students in 190 countries, studying on 100-plus degrees, diplomas and certificates around the world. Although proudly rooted in London, our community and impact are global.

Among our former students are six Nobel Prize winners, including: Nelson Mandela; the eminent Caribbean writer, Derek Walcott; and Charles Kao, a pioneer in the development of fibre optics.

Also, a federation of 17 esteemed higher education institutions, with collaboration at the heart of our ethos. **The University of London federation is a collective community of more than 240,000 learners and 50,000 staff, delivering world-leading research across all disciplines.**

Its passion for increasing access to education and mobilising the collective power and expertise of the federation is central to its ability to transform lives around the world and address the global challenges of the future.

The **MSc in Professional Accountancy** is globally available. Many of our members and affiliates choose to study via distance learning, meaning there's no need to relocate or take time out from your career.

ABOUT THE NEW SYNERGY SPECIALIST (TNSS)

TNSS provides a fusion of vibrant, interactive and tailored learning solutions geared towards ensuring students' examination success across all levels of the ACCA qualifications. **TNSS offer career-focused blended learning**, as well as providing online courses across the world and work in partnership with ACCA.

ABOUT MSC PROFESSIONAL ACCOUNTANCY

The MSc in Professional Accountancy is designed for career-minded finance professionals who wish to complement their professional skills with master's level understanding and skills, applied to accountancy and finance subject areas.

Part Way Requirement for both ICAN and ACCA Members.

- Full ICAN members or ACCA Affiliate and members
- 3 Modules/ 6 months completion option
- Local teaching centre/ web support
- Flexible payment option

THE MODULES

The MSc Professional Accountancy consists of:

- Two elective modules (15 credits each)
- One Capstone project module (30 credits).

Individual modules will be available to study on a stand-alone basis (subject to module availability).

ENTRY REQUIREMENT

To satisfy the entrance requirements to register for the MSc, an applicant must have fulfilled the professional membership requirements of a professional accountancy body from our approved list which can be found here: london.ac.uk/professional-accountancy

ACADEMIC DIRECTION

Academics within UCL's School of Management provide the programme direction for the MSc, designing the modules, developing the learning content, and setting and marking the assessments. Therefore, you benefit from UCL's academic expertise and cutting-edge research and experience of delivering a range of accounting, finance, and management related courses, both on-campus and online

ABOUT MSC DATA SCIENCE

The MSc Data Science suite of programmes offers students skills which will help them not only in their current job but prepare them for their future career trajectory.

This programme teaches the skills needed by data scientists to drive improvements to organisational performance. By combining the statistical and computational skills to generate insights, data can be used to enhance business delivery across a range of sectors. Students will learn the mathematical foundations of statistics, data mining and machine learning, and apply these to practical, real-world data

The MSc Data Science has been developed by the University of London with academic direction by Goldsmiths, University of London, which offers a similar programme on campus.

The innovative study method gives students the freedom, right from the start of their studies, to create their own software projects. The innovative study method gives students the freedom, right from the start of their studies, to create their own software projects.

The MSc Data Science draws upon the city's creative environment. You'll be equipped with skills that will keep you up to date with the leading industry trends and innovations, wherever you are in the world.

THE MODULES

Learners will need to take twelve (12) modules. They are: five core modules, plus two compulsory modules, plus four optional modules, plus final project in data science and mathematics for data science.

ENTRY REQUIREMENT

We offer two entry routes into these programmes, so if you do not meet the academic requirements, you may still be eligible to apply through an alternative route.

For more details on entry requirements and eligibility, please visit

bit.ly/DataSci-entry-reqs

Entry Route 1

To be eligible to register for any of the Data Science programmes, you must have the following:

- A bachelor's degree (or an acceptable equivalent) in a relevant subject which is considered at least comparable to a UK second class honours degree, from an institution acceptable to the University.

Entry Route 2

If you do not meet the academic requirements for Entry Route 1, you can apply for the programme via Entry Route 2. To be eligible to register, you must have the following:

- A bachelor's degree (or an acceptable equivalent) in any subject which is considered at least comparable to a UK second class honours degree, from an institution acceptable to the University.

For Entry Route 2, you will also be required to complete an online preparatory course prior to registration. The online preparatory course, 'Foundations of Data Science,' requires approximately 30 hours of study.

This route helps you to develop the necessary skills to complete the full Msc programme successfully.

ACADEMIC DIRECTION

The academic content for the postgraduate Data Science programmes has been developed by the Department of Computing at Goldsmiths, one of the UK's top creative universities. Goldsmiths is world renowned for teaching and research in creative, cultural and computational disciplines.

Goldsmiths encourages students to explore ideas, challenge boundaries, investigate fresh ways of thinking and stretch themselves intellectually and creatively.

HOW TO APPLY

To apply for either the Msc Professional Accountancy or Msc Data Science, kindly visit:

www.thenewsynergyspecialist.com/uol/appy
